

Refrigerated Transporter's

2026

Origins

2026

Begin your research by looking in the state from which your shipment will originate. A carrier whose name appears here and also in the Destinations list (in the section that follows) may be able to handle your refrigerated LTL shipments.

Refrigerated LTL Routing Guide

Developed as a resource for those who ship refrigerated less-than-truckload shipments within the U.S. and Canada, companies listed in this directory have indicated they perform the services described. Use the Origin and Destination sections to determine carriers with traffic between specific state pairs. Once potential carriers have been selected, screen more carefully using the information in the Carrier Index to contact the company directly to determine if it can handle your particular load. This guide indicates service in general terms only. Carriers cannot be held specifically to the information listed here.

Asset-based carriers who missed being listed in this guide should contact Refrigerated Transporter to be included in the next LTL Guide. There is no charge for the basic listings for asset-based carriers. Companies can also upgrade their listings to include web and email addresses. Non-asset-based companies that advertise with RT are also included in the listings.

Find contact info for each company in the Carrier Index on p. 9
